

Intel Retail Sensor Platform Delivers Near 100% Inventory Accuracy

Intel's Retail Sensor Platform provides system integrators and retailers an out-of-the box, advanced, in-store analytics platform. This simple-to-install solution manages RFID-based retail sensors through an Intel®-based gateway, and supports analytics capabilities from the edge to the cloud. It also provides an easily deployable cloud and big data analytics architecture provided by the Responsive Retail Sensor Cloud Software, allowing system integrators the ability to deliver applications that can boost retail profitability and provide new insight into product demand, consumer behavior and store logistics.

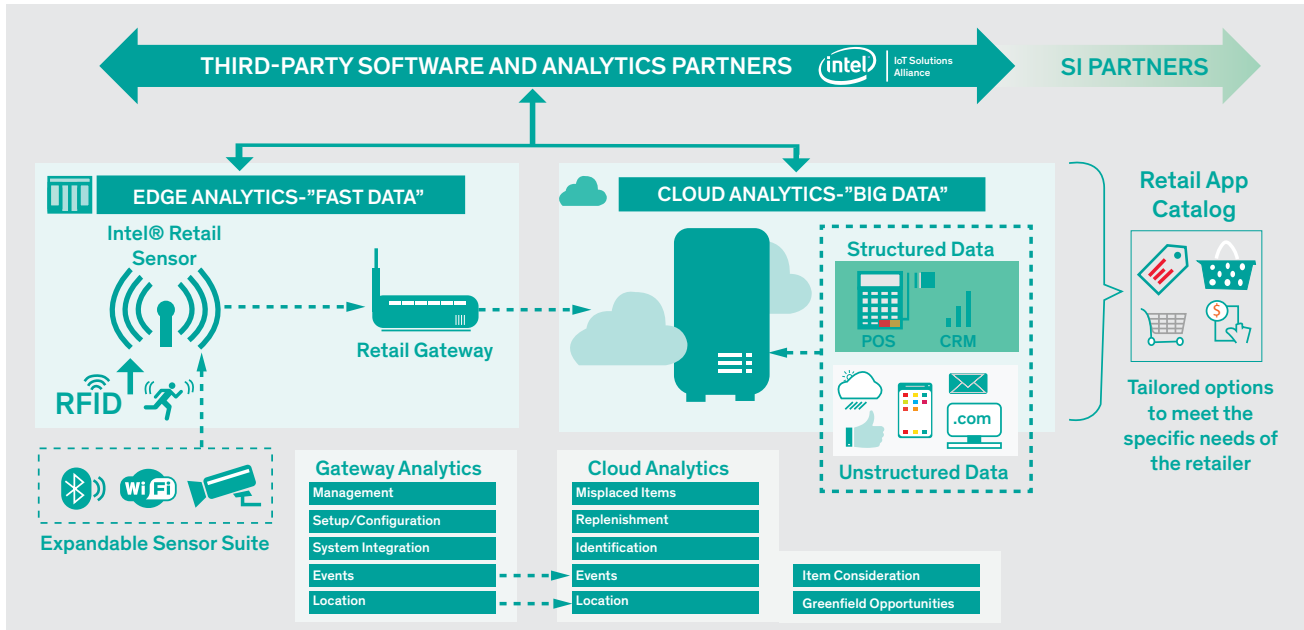

The Intel® Retail Sensor Platform is an end-to-end solution designed to help system integrators and retailers quickly create and deploy innovative retail solutions informed by analytics.

- Addressing Inventory Challenge**
- > Path Mapping
 - > Item Consideration
 - > Item Movement
 - > Misplaced item
 - > Item Replenishment
 - > Item Identification
 - > Item Location
 - > Pick-Path Optimization
 - > Inventory Reconciliation

Intel® Retail Sensor Integrated Technologies

Intel® IoT ecosystem partners support retailers data collection and analysis

Intel® Retail Sensor Platform Key Benefits

- > Based on an industry-standard, open software platform seamlessly integrating multiple devices
- > RFID reader and antenna provides 150-300 square feet of coverage per sensor at more than 600 tag reads per second
- > The gateway finds, configures and interacts with the Intel® Retail Sensors over Ethernet without 3rd party middleware
- > Open-source analytics platform. The cloud-based, horizontal platform features an integrated stack that reduces complexity and provides greater control to businesses
- > The RRS cloud software accelerates the creation of secure, high-performance big data analytics applications in cloud environments.
