# IBM FlashSystem FCM4 Announcement Call

Wednesday (2/28) Announcement Call ([replay now available](#)) to introduce unparalleled ransomware threat detection capabilities to the FlashSystem portfolio with FCM4:

**[Register Here](#) to watch the replay from the 2/28/24 Call!**

The new **IBM FlashSystem with FlashCore Module 4 (FCM4)** uses AI and machine learning to identify ransomware threats in real-time, without compromising performance.

Learn how AI and machine learning models enable swift identification and reaction to threat alerts and continuous evolution of storage defenses.

Join cyber-resiliency experts Andy Walls, IBM Fellow, FlashSystem CTO and Chief Architect, and Ian Shave, Director of Worldwide Storage, to learn all about it at the exclusive webinar held on 28 February, at 9:00 AM ET. Don't forget to invite your clients!

# IBM FLASH IN A FLASH

SWAT Team Webinar Series

The IBM Flash in a Flash series is designed to give you skills and resources to be successful in selling IBM FlashSystem.

This weekly IBM webinar focuses on important FlashSystem topics in short 30- minute segments. There will be ample time for questions, and all sessions will be recorded.

## Join Us February – December 2024

# IBM Cyber Academy

**IBM Security**

**IBM Ecosystem**

**IBM Storage**

**Join us for this in-depth, in-person training on Cyber Security and Resiliency Skills & Solutions**

Learn to leverage IBM's suite of cyber security and cyber resilient offerings.

Help your client build a complete strategy to Zero Trust. This "trust no one" solution can help organizations protect, limit and recover from cyber-attacks.

Attendance is no cost, and you will learn from skilled IBM practitioners:

- Security and Data Resilience Concepts
- Cyber Offerings from IBM Security and IBM Storage
- Regulatory Framework affecting Data Security, Retention, and Protection
- Cyber Resilience scenarios and best practices

IBM has real technological advantages in helping clients create a holistic and integrated approach to combat cyber-crime.

[Register today](#) to join one of these regional Cyber Summits:

Feb 27-29 San Jose, CA

May 14-16 Washington, DC

Aug 20-22 Chicago, IL

Nov 5-7 Dallas, TX

Registration Site for [San Jose available here](#). Others to follow.

# FlashSystem Competitive Training Series

## IBM FlashSystem Competitive Series

Our amazing competitive team – Mike Kachmar and Brian Sherman – have put together an informative series of competitive updates. We will explore strategies and portfolios of each vendor and position IBM's competitive advantages. Join us as we give you the information you need to compete against these vendors:

- Week 1: Dell
- Week 2: HP
- Week 3: NetApp
- Week 4: Pure

**[Register Here](#)**

(replays available)

# Arrow IBM Storage Programs and Incentives Update

# 1Q 2024 IBM Storage Ecosystem Promotions & Incentives

## FlashSystem Test Drive

### FlashSystem 2 Week Proof of Concept for BP Clients!

One Form  
2-Week Lead Time  
Two Week Testing  
Zero Cost

## Trade-in Program

**Trade-in Payment rebate** when clients purchase new IBM FlashSystem or disk and trade in competitive or old IBM storage

[Link](#)

## Better Way to Grow

**Free Virtualization** when FIE Virtualization Clients purchase IBM FlashSystem

[Link](#)

## Propose & Earn

+ transactional margin & up to 3.7% firm rebate

\$1,000 individual reward for joint meeting  
+  
\$1,000 for PoC/Assessment  
+  
\$100 for SAN health check at new Flash clients.

[Link](#)

(Independent of actual sale)

## More in Store

**+20% more FCM capacity at no cost** for FS5200, FS7300 & FS9500 thru 3/31/24

Gives your client the extra capacity needed for immutable data protection & cyber resiliency

[Link](#)

## SAN Value Bundle

**20% lower price on SAN** when bundling FlashSystem 5000 base arrays and include two 24-port SAN24B-6 Fibre Channel switches (pre-selected in IBM eConfig tool)

[Link](#)

## SAN Promotions

c-type: Director Tech Refresh Program & Switch Discount Program

b-type: Gen 7 Director Program when selling with IBM DS8000, FlashSystem, Tape

[Link](#)

## Sell & Earn

### BP Individuals Earn big with Flash!

- \$1K-10K/box for existing clients & up to \$15K/box for New Clients
- Rewards for SAN b-type with Flash
- \$500 per 10K of Defender sold to existing clients & \$1K per 10K when sold to New Clients

[Link](#)

Value Seller & Margin changes went into effect on 1/1/2024

# Test Drive IBM FlashSystem

2 WEEKS.

NO COST. NO CONTRACT.

*...because seeing is believing!*

FlashSystem 5200

FlashSystem 7300

FlashSystem 5015

FlashSystem 5035

FlashSystem 5045

## ONE FORM

- BP sends [request form](mailto:sander@irent.nl) directly to iRent [sander@irent.nl](mailto:sander@irent.nl)
- iRent will review and get IBM approval within 48 hours

## TWO WEEK LEAD TIME

- 2-week usual lead time to configure and deliver
- iRent handles ALL logistics
- BP and Client complete Test Drive Checklist

## TWO WEEK TESTING

- 2-week on premise for testing and Proof of Concept.
- Client or BP location

## ZERO COST

- No Cost to Client or BP
- No commitment to purchase
- iRent schedules pickup

## PRE-SALE! Propose & Earn

\$1,000

FIE Client Meeting

\$1,000

FIE Client Assessment

## Sell & Earn

\$1,000-  
\$15,000

FlashSystem Sales

✓ Must have active deal registration number, and an IBM Seller must be present.

\*FIE clients haven't purchased qualifying product over the last 36 months

[Refer to KYI Terms and Conditions for complete details & product eligibility](#)

# IBM Storage Rewards

## Propose and Earn (FIE only)

Activity	First In Enterprise
Client Meeting	\$1,000
Assessment (CRAT, POC, etc.)	\$1,000
SAN Health Assessments	\$100

✓ Must have active deal registration number, and an IBM Seller must be present.

## Sell and Earn

IBM FlashSystem <i>Through June 30, 2024</i>	Reward	First In Enterprise
FlashSystem 5015/5045	\$1,000	\$1,000
FlashSystem 5200	\$3,000	\$3,000
FlashSystem 7300	\$10,000	\$15,000
FlashSystem 9500	\$10,000	\$15,000

IBM Storage Defender	Reward	First In Enterprise
IBM Storage Defender	\$500 for every \$10K Sold	\$1,000 for every \$10K sold

IBM Storage as a Service	Reward	First In Enterprise
StaaS Tier 4: 9601-CT1, CT2, CT3, CT4, CT5	\$3,000	\$3,000
StaaS Tier 1-3: 9601-BT1, BT2, BT3, BT4, BT5 9601-MT1, MT2, MT3, MT4, MT5 9601- HT1, HT2, HT3, HT4, HT5	\$10,000	\$15,000

IBM Brocade SAN <i>Must be sold with FlashSystem</i>	Reward
SAN24B-6	\$100/pair
SAN64B-7	\$500/pair
SAN128B-7	\$1,000/pair
SAN256B-7, SAN512B-7	\$2,000/pair

[Maximum Cap Per Sale:](#)

North America \$30,000 / Annual Individual Max \$100,000

- All rewards can be split between Sales and Technical Sellers

# IBM FlashSystem “more in store” offer

Cyber recovery guaranteed - with capacity on us

## Buy 10 FlashCore Modules

FlashSystem 5200

get 2 on us

## Buy 20 FlashCore Modules

FlashSystem 7300

get 4 on us

## Buy 30 (or 40) FlashCore Modules

FlashSystem 9500

get 6 (or 8) on us

## REALIZE INSTANT BENEFITS

### CYBER-RESILIENT

Enhanced data protection and fast data recovery guaranteed\*

### LOWER COST

Immediate savings with 20% more capacity on us

### UNRIVALLED DENSITY

1PB per rack unit saving power/cooling & DC space (excellent sustainability)

### GUARANTEED\*

<60 Second Cyber Recovery, 100% Availability & Data Reduction,

for BPs

### SIMPLE CONFIG

No charge items automatically added when you configure the minimum chargeable features

### MORE MARGIN

Leverage Value-Seller for fast approval and uncapped margin

“more in store” offer available through March 31, 2023

\* Terms and conditions apply

# IBM FlashSystem 5000 Value Bundle

Lower Cost for a Modernized, High Performance, Cyber-Resilient Storage Solution

The FlashSystem 5015/5035/5045/5200 base arrays include two 24-port SAN24B-6 Fibre Channel switches pre-selected in IBM eConfig tool

FlashSystem  
**5015**  
**5035**  
 **5045**  
Value Bundle

FlashSystem  
5015/5035/5045

Bundled with two  
24-port SAN24B-6 base  
switches and **8 x 16G** SWL  
SFPs.

FlashSystem  
**5200**  
Value Bundle

FlashSystem 5200

Bundled with two  
24-port SAN24B-6 base  
switches and **8 x 32G** SWL  
SFPs.

## REALIZE INSTANT BENEFITS

### LOWER COST

Immediate savings on  
Flash+SAN bundle vs.  
a-la-carte price

### PERFORMANCE

Match Storage-SAN  
speed for optimum  
workloads

### CYBER-RESILIENT

Enhanced data  
protection and fast data  
recovery

### SCALABILITY

Add ports on-  
demand for simple  
device connectivity

### ADV FEATURES

Offer advanced, enterprise  
storage services with entry  
storage arrays

### MORE REVENUE

Increase revenue and  
margin with the Flash &  
SAN Value Bundle

### SIMPLE CONFIG

Quickly provide an  
end-to-end storage  
configuration

for BPs

# Three compelling reasons for customers to refresh Gen 5 switches

## #1 Performance

Gen 5 switches are 10 to 12 years old

#2 Brocade **FOS End of Availability** April 2023  
Security Vulnerability

IBM Name	IBM Model	Support EOS	Refresh Model
SAN768B-2	2499-816	<b>FOS EOA: 4/30/2023</b> HDWR End-of-Support: 4/30/2025	GEN7 8961-F78
SAN384B-2	2499-416	<b>FOS EOA: 4/30/2023</b> HDWR End-of-Support: 4/30/2025	GEN7 8961-F74
SAN96B-5	2498-F96 / N96	<b>FOS EOA: 9/21/2024</b> HDWR End-of-Support: 4/30/2027	GEN7 8969-P96/R96
SAN48B-5	2498-F48	<b>FOS EOA: 6/17/2023</b> HDWR End-of-Support: 6/17/2025	GEN7 8960-P64/R64
SAN24B-5	2498-F24 / X24	<b>FOS EOA: 4/30/2023</b> HDWR End-of-Support: 4/30/2025	GEN6 8969-F24* (sell with Flash Bundle)
SAN24B-4	2498-B24	<b>FOS EOA: 4/30/2023</b> HDWR End-of-Support: 4/30/2025	GEN6 8969-F24* (sell with Flash Bundle)

# 3 Sept 1, 2023  
IBM increased  
**Maintenance Support cost** for GEN5 products!

## Why are FOS EOA (End-of-Availability) dates important?

After the hardware product is two years past its Last Customer Ship (LCS), **there will not be any more scheduled FOS releases with bug fixes or improvements for the switch.** This also means that scheduled FOS patches for recent security vulnerabilities won't be available, potentially compromising your SAN environment's security and data protection.

- **NOW** is the time to plan to replace aging Gen 5 platforms. Note, most likely attached to older storage.
- Run **SAN Health Diagnostic Tool** to discover and identify old Storage and SAN opportunities

# Customer “Gen 5 Refresh” Flyer

## Customer Engagement

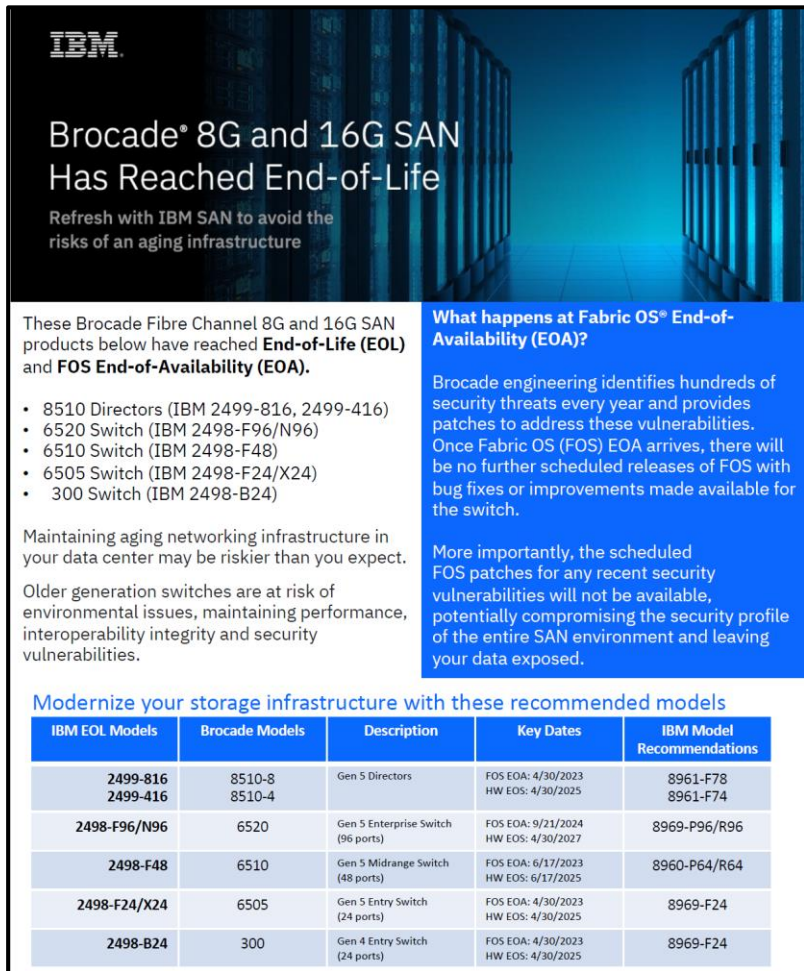

- Send customers this [flyer](#) to begin refresh discussions
- Help them identify Gen 5 switches that could impact solution performance
- Discuss potential security vulnerabilities of legacy switches
- Encourage them to avoid increased support costs and with an updated SAN infrastructure

## Download these other tool to help

Solution brief: [IBM b-type Storage Networking: Enabling a cyber resilient, autonomous SAN](#)

Evaluate your current environment with a simple to use (DIY) [SAN Health diagnostic tool](#) today

**IBM**

### Brocade® 8G and 16G SAN Has Reached End-of-Life

Refresh with IBM SAN to avoid the risks of an aging infrastructure

These Brocade Fibre Channel 8G and 16G SAN products below have reached **End-of-Life (EOL)** and **FOS End-of-Availability (EOA)**.

- 8510 Directors (IBM 2499-816, 2499-416)
- 6520 Switch (IBM 2498-F96/N96)
- 6510 Switch (IBM 2498-F48)
- 6505 Switch (IBM 2498-F24/X24)
- 300 Switch (IBM 2498-B24)

Maintaining aging networking infrastructure in your data center may be riskier than you expect.

Older generation switches are at risk of environmental issues, maintaining performance, interoperability integrity and security vulnerabilities.

**What happens at Fabric OS® End-of-Availability (EOA)?**

Brocade engineering identifies hundreds of security threats every year and provides patches to address these vulnerabilities. Once Fabric OS (FOS) EOA arrives, there will be no further scheduled releases of FOS with bug fixes or improvements made available for the switch.

More importantly, the scheduled FOS patches for any recent security vulnerabilities will not be available, potentially compromising the security profile of the entire SAN environment and leaving your data exposed.

**Modernize your storage infrastructure with these recommended models**

IBM EOL Models	Brocade Models	Description	Key Dates	IBM Model Recommendations
2499-816 2499-416	8510-8 8510-4	Gen 5 Directors	FOS EOA: 4/30/2023 HW EOS: 4/30/2025	8961-F78 8961-F74
2498-F96/N96	6520	Gen 5 Enterprise Switch (96 ports)	FOS EOA: 9/21/2024 HW EOS: 4/30/2027	8969-P96/R96
2498-F48	6510	Gen 5 Midrange Switch (48 ports)	FOS EOA: 6/17/2023 HW EOS: 6/17/2025	8960-P64/R64
2498-F24/X24	6505	Gen 5 Entry Switch (24 ports)	FOS EOA: 4/30/2023 HW EOS: 4/30/2025	8969-F24
2498-B24	300	Gen 4 Entry Switch (24 ports)	FOS EOA: 4/30/2023 HW EOS: 4/30/2025	8969-F24

# A better way to GROW

Need **MORE**  
storage  
capacity?

You could add to your existing  
storage *but...*

✗ No guarantee of  
performance increase

✗ Restrictive commercial  
and financial options

✗ Potential increased  
maintenance costs

## Qualifying Conditions

FlashSystem Model	SVC Condition	Min. FCM Drives	Number of Non-IBM Systems Eligible	Duration of Virtualization Enabled	Warranty/Maint Terms
9500	No SVC Installed	8	5	3 Years	Machine Type 4673 (3yrs Expert Care Advanced)
7300		8			Machine Type 4658 (3yrs Expert Care Advanced)
5200		3			Machine Type 4662 (With Min. 3yrs Expert Care Basic)

Seismic

## Value Statement

“IBM FlashSystem will provide the upgrade of additional capacity you need going forwards, while leveraging your existing non-IBM storage assets; simplifying management, easing data migration and accelerating performance for the next 3 years at no additional cost”

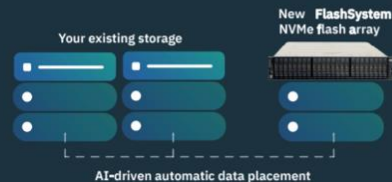

## A better way to **grow**

Supercharge  
your upgrade...

- ✓ Accelerate applications
- ✓ Maximize existing storage investments
- ✓ Drive data placement across all storage with AI
- ✓ Simplify storage management
- ✓ Ease any required data migration

Buy an IBM FlashSystem® 5200, 7300 or 9500/R and virtualize your existing storage at no additional cost.\* Now benefit from increased capacity and performance within a new, optimized single pool of storage.

Modernize and accelerate  
ALL of your storage

# IBM Storage No-Charge Removal Program

End Users benefit from having IBM remove their old IBM or non-IBM equipment at no charge when they acquire new IBM Storage.

# SAN Attach Sales Program for b-type Gen 7 SAN Directors

When selling with IBM DS8K, FlashSystem and Tape

Ensure optimum performance and security for IBM Storage Proposals by including the SAN

[REGISTER HERE](#)

IBM SAN256B-7  
(8961-F74)

IBM SAN512B-7  
(8961-F78)

**This program allows you to receive a pre-approved discount when you include IBM b-type Directors with IBM Storage proposals.** Includes current storage proposals and previous 2023 deals. Program ends June 30, 2024.

## Qualifying Products

IBM b-type Director Chassis

IBM SAN512B-7 (8961-F78)  
IBM SAN256B-7 (8961-F74)

## Qualifying blades (32G)

These Feature Codes are discounted

- **FC3403:** Gen 7 48-port blade with 32G LWL SFP+ optics
- **FC3402:** Gen 7 48-port blade with 32G SWL SFP+ optics
- **FC3401:** Gen 6 48-port blade with 32G LWL SFP+ optics
- **FC3400:** Gen 6 48-port blade with 32G SWL SFP+

## Qualifying Blades (64G)

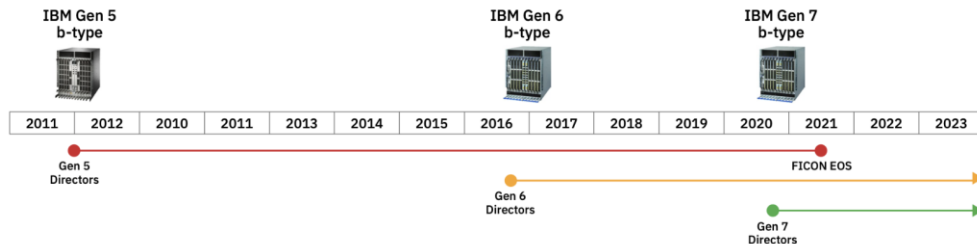

These Feature Codes are discounted

- **FC3265:** Gen 7 64-port blade with 64G SWL SFP-DD optics
- **FC3405:** Gen 7 48-port blade with 64G LWL SFP+ optics
- **FC3404:** Gen 7 48-port blade with 64G SWL SFP+ optics

**<< for DS8k, Tape & Flash bundled with IBM Brocade Directors for storage sold during 2023 and current proposal**

## Why include Gen 7 SAN with your storage proposals?

Don't let customers connect new IBM Storage to legacy storage networks and risk a non-optimum solution

# IBM SAN c-type Director Program

## Two Director Tech Refresh options:

### Cisco Tech Refresh

(refreshing Cisco gear)

- Purchase qualifying c-type Director\*
- Buy 3 qualifying linecards (with 48 SFPs on each)\*\*
- Get 1 additional linecard or bundle at no charge
- All linecards must have chargeable SFPs; "bundles" and their associated RPQs come with SFPs, which are N/C in the bundle RPQ.

### Competitive Tech Refresh

(refreshing Broadcom gear)

- Purchase qualifying c-type Director\*
- Buy 2 qualifying linecards (with 48 SFPs on each)\*\*
- Get 2 qualifying linecards or bundles at no charge
- All linecards must have chargeable SFPs; "bundles" and their associated RPQs come with SFPs, which are N/C in the bundle RPQ.

### Qualifying Products\*

IBM c-type SAN Products

SAN192C-6 (8978-E04)

SAN384C-6 (8978-E08)

SAN768C-6 (8978-E16)

Click [HERE](#) to learn more on the products

Base Feature Code**	Promotion Feature	e-config Description (IBM product documentation often refers to a linecard as a "FC Switching Module")
AJL8	<b>8S1918</b>	48-port 64Gbps FC Switching Module and 64G SW SFP Bundle
AJL6	<b>8S1943</b>	48-port 64Gbps FC Switching Module (Empty Linecard – billable SFPs must be configured with it)
AJL7	<b>8S1917</b>	48-port 64Gbps FC Switching Module and 32G SW SFP Bundle
AJL4 and AJHE or AJHJ	<b>8S1924</b>	48-port 32Gbps FC Switching Module (Empty Linecard - billable SW 32Gbps optics must be configured with it)
AJL4 and AJHF or AJHK	<b>8S1925</b>	48-port 32Gbps FC Switching Module (Empty Linecard - billable LW 32Gbps optics must be configured with it)

AI Acceleration & Deployment	Watsonx & IBM Fusion to accelerate deployment and accelerate AI / queries 7x - 90x

Let Arrow help you with these conversations with your clients

# Business continuity and data resiliency

IBM Security + IBM Storage equip customers to detect, respond and recover from cyber incidents

## Detect, respond and recover from an attack with IBM Security and IBM Storage

How can intelligent security and storage decrease your customer's Recovery Point Objective (RPO) and Recovery Time Objective (RTO) following a cyber attack? Try out the Cyber CRISIS use case available in Cyber Range to find out. Using IBM Security® QRadar® SIEM, QRadar SOAR and immutable IBM Flash Storage, you can resist and recover quickly.

In today's digital economy, high availability (HA) and disaster recovery (DR) solutions are non-negotiable for IT teams. Organizations that depend on data and systems as the bedrock of their operations must adopt these measures to prosper. Downtime and data loss can have significant financial and reputational consequences. Help your customers move beyond traditional HA and DR to become cyber resilient.

### Cyber Security

Keep bad actors out of an environment

### Cyber Resiliency

Withstand, recover from and adapt to disruptive events

## ORGANIZATIONS SHOULD BE CYBER SECURE AND CYBER RESILIENT

- › Access controls (e.g., multi-factor authentication, role-based access control)
- › Data encryption
- › Security incident and event management (SIEM)
- › Vulnerability management
- › Malware protection

- › Business continuity and disaster recovery (BCDR) planning

## IBM's road to cyber resiliency webinar series

Join Frank Welder and Tony Owens for a powerful 3-part webinar series – IBM's road to cyber resiliency. This series focuses on today's major threats and how you can improve your customers' cyber resiliency...You won't want to miss the first part of the series – "Understand the adversary" – see details below and register today!

### Part One: Understand the adversary.

**Date**  
Wednesday, October 18

**Time**  
12 p.m. ET

Take a journey as seen through the eyes of a hacker.

What are we up against?

This session focuses on the types of attacks and techniques that cyber attackers use to infect your systems, evade detection and monetize their effort.

Learn what makes you a target for hackers and how to structure your defense to make you a harder target.

The Storage CR Assessment provides a bridge mechanism to assess client's current state and identify gaps against best practice requirements based on the NIST CSF.

Contains references to other industry recognized standards & frameworks: ISO, COBIT, ISA, Council on Cyber Security, etc.

# IBM Cyber Resiliency Assessment Tool (CRAT)

## Workshop includes:

- Two-hour virtual consulting workshop with IBM Storage & Security POV
- Assessment probes over 100 different vital controls across 20+ key categories from a Cyber Resilience standpoint
- Delivered using technology / vendor neutral framework

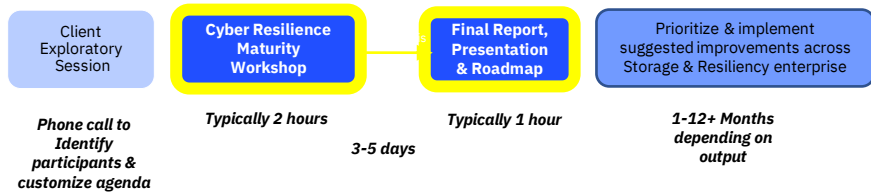

## Client Outcomes:

- Identification of blind-spots and recommended areas for improvement
- Discovery of the utilization of various existing solutions, integrations and overlaps that can be fine-tuned
- Customized Cyber Resilience strategy fitting the client's vision & mission

## Deliverables:

- Detailed assessment report
- Management presentation
- Roadmap of recommended improvements & considerations
- Non-invasive
- Quick (2 hrs. to complete)
- IBM Funded

## Cyber Resiliency Strategy and Roadmap

## Sample Deliverables

# IBM Fusion: Cross-Brand Solutions

- Application Modernization
- Cloud Pak for Data / Cloud Pak for Security / Other Cloud Pak Solutions
- watsonx (.ai & .data)
- Virtualizing VMs with OpenShift

Let Arrow help you with this conversation with your clients

Look for Upcoming Arrow Enablement Calls & Training

# Fusion and watsonx sales play

## Huge Opportunity

On premises **watsonx**

**872** **watsonx** deals in 2024 at \$109M

**75%** on-prem

**Fusion can accelerate deployment & accelerate queries 7X-90X**

## Great Momentum

**59** **watsonx.data** wins in 4Q23

**15** **watsonx.data** wins included Fusion

**4** **watsonx.data** wins have Fusion opportunities

### Q1 2024 Pipe

- Opportunities identified in all Geos except Japan

## Great Support

Fusion **watsonx** t-shirt easy sizing

Fusion Wave

- 1** **watsonx** dedicated POK
- 1** **watsonx** dedicated EMEA (coming soon)

GPU strategy/alignment

Certified Fusion hardware coming

Benchmarks coming

**Q1 Education** – Data & AI, CSM, Partner, ATL

## Your Action

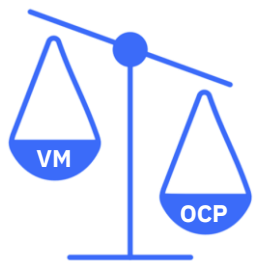

Storage Sellers engage **watsonx** clients together with Data & AI Sellers

Use **Fusion HCI 4 special offer pricing, three t-shirt sizes**, and quantified client value

ELA Fusion software can be brought to Fusion or added to their own X86 hardware

Learn from actual client value for each case fusion offer

## Majority of apps will be cloud-native

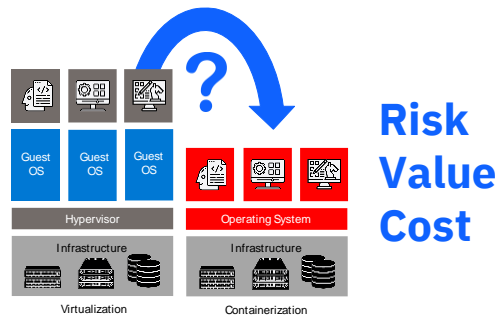

**95% new**  
cloud-native  
Read the Gartner report  
Strategic replatforming

Source: State of Workload Deployment on Containers and Kubernetes

## Infrastructure Fork in the road

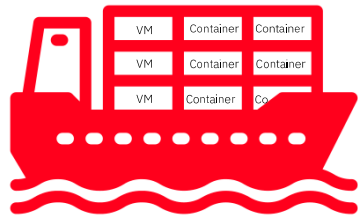

## Maintain some VM-based apps

## OpenShift + Fusion runs VMs

**First-class**  
**No duplication**

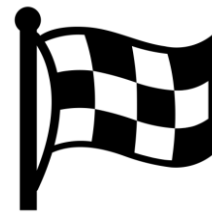

- ↓ Cost
- ↑ Simplicity
- ↑ Performance
- ↑ Protection
- ↑ Availability

## Rethink infrastructure

## Start using Virtual Machines on OpenShift with Fusion

# Updated Operating Model for IBM Storage (& Power) Offerings

Effective January 2, 2024, IBM is making a series of changes designed to optimize the manufacturing and supply chain operating model of IBM Storage hardware offerings including:

- We are **designating standardized parts across all and IBM Storage offerings**, which will be readily available. Other parts categories will be subject to industry lead times.
- We are **accommodating pre-builds of unfirm orders, with appropriate approvals**, for:
  - DS8000
  - Storage Scale System
  - Virtual Tape Server
  - TS1100 Tape Drives
  - TS4500 Tape Library
  - Diamondback Tape Library
  - Storage Area Network (SAN)
  - E1080 POWER Server
- For the remainder of the IBM Storage product lines, we will **transition to a firm order only policy** for these **High-Velocity Storage Offerings** (see next page). No need to place on OMV unless bundled with a High-end offering.

With this refreshed end-to-end approach, clients, partners, and sellers will experience:

**Simplified Ordering - Improved Fulfillment – Faster Delivery**

# Storage Solutions

You can find a list of standard and non-standard parts in respective ordering/configuration tools:  
ACT Availability Tool: <https://www.ibm.com/servers/econfig/act/pages/workbench>  
eConfig: <https://www.ibm.com/services/econfigcloud/#/>  
StorM: <https://www.ibm.com/tools/storage-modeller/#/projects>

## High End

OMV – High(B) / Low (P)  
*Can prebuild if approved*

- DS8K
- TS7700 – HYDRA
- TS4500 – ANACONDA
- TS1100 – JAGUAR DRIVES
- DIAMONDBACK – 488x
  
- **SAN-B**
- **SAN-C**
- **ESS**
  
- **Norm. Leadtime = 15 Days**
- **Ext Leadtime = Varies**

## High Velocity

No OMV scheduling  
*Firm-only policy*

- FS5x/FS7x/FS9x
- SVC
- COS
- CEPH/DEFEND
  
- **LTO (LE) – 3555/357x/358x**
- **TAPE MEDIA – 3589/3599**
- **RMSS – 7226/72XX**
- **FUSION - 9155**
  
- **Norm. Leadtime = 10 Days**
- **Ext Leadtime = Varies**

## Non-Standard Parts

- No planning sent to supplier
- 16-week (80-Days) leadtime in e-config
- Should have an equivalent standard part
- Book and chase model
- Planned ship date confirmed once supply secured
  
- **Norm. Leadtime = 80 Days**

Leadtime is business days. 5 days = 1 week. Plus transit time – Guadalajara approx. 1 week to 10 days.

# IBM Storage: Deal Reg Groups and Product Mapping for Proficiencies
